

**Prof. Volker Wieland, Ph.D.**  
**Professor for Monetary Economics**  
**Goethe-University Frankfurt**  
**Summer Semester 2017**

## **Monetary and Fiscal Policy: Theory and Practice**

### **Field Course (4 CP, Macroeconomics)**

#### **General Information and Schedule**

This lecture is a 2<sup>nd</sup> year Ph.D./MSQE field course (4 CP, Macroeconomics) taking place during the 1<sup>st</sup> half of the summer semester 2017.

Time: Tuesdays 10 - 12 a.m. and Wednesdays 10 - 12 a.m.

Location: Room Sydney (House of Finance 3.45)

For non-regular classes see the latest schedule online at:

[www.imfs-frankfurt.de/en/chairs/monetary-economics/teaching/ss-2017](http://www.imfs-frankfurt.de/en/chairs/monetary-economics/teaching/ss-2017)

First lecture: Tuesday, April 18, 2017

Last lecture: Wednesday, May 31, 2017

Teaching Assistant: Philipp Lieberknecht (HoF 4.50)

Registration: Please send an e-mail to Philipp Lieberknecht ([philipp.lieberknecht@econ.uni-frankfurt.de](mailto:philipp.lieberknecht@econ.uni-frankfurt.de)) to confirm that you wish to obtain regular course information and whether you will take this course for credit. Please include your matriculation number, student status (Ph.D. or MSQE), year of study and full name. Note that in order to get credit points you also need to register with the Office of Academic Records at GSEFM.

#### **Course Requirements**

Throughout the course two problem sets will be offered to allow you to study and apply the various models and concepts in practice. There will also be a final exam. The course grade will depend on the final exam (70%) and on the problem sets (30%).

#### **Course Overview, Objective and Background Readings**

The objective of this course is to provide an introduction to the analysis of monetary and fiscal policy making with practical applications to current policy challenges. Examples from the European Union, the United States and Japan will be discussed. We will develop theoretical models of monetary and fiscal policy and learn how different policy recommendations can be evaluated using these models. Students will conduct practical simulation exercises and make use of MATLAB-based software tools for model analysis.

The following is an outline listing the main topics of the lectures and relevant background readings. Further details regarding the schedule, slides and handouts will be provided during the course.

*Short Outline:*

1. Introduction
2. Monetary models and monetary policy rules
3. Optimal Control and New Keynesian modelling: Inflation targeting and the ECB
4. Quantitative easing and the zero bound on nominal interest rates
5. Government budget constraints and monetary-fiscal policy linkages
6. Fiscal stimulus and multiplier effects
7. Government debt dynamics and fiscal consolidation
8. Financial accelerator, housing markets and macro-prudential regulation

*Background Readings:*
